Chapter 1. INTRODUCTION

1.1 Motivation

1.2 Literature Survey

1.2.1 Extrusion Process

1.2.2 Single screw geometry

1.2.3 The development of single-screw plastificating extruders

1.2.4 General introduction of the Barrier Screw

1.2.4.1 Introduction

1.2.4.2 History of the Barrier Screw

1.2.4.3 Basic principle of the Barrier Screw

1.2.5 Types of the Barrier Screw

1.2.5.1 The MAILLEFER Screw

1.2.5.2 The BARR Screw

1.2.5.3 The DRAY Screw

1.2.5.4 The KIM Screw

1.2.5.5 The LAWRENCE Screw

1.2.6 The INGEN HOUSZ Screw

1.2.7 The MAILLEFER's Theory

1.3 Purpose

Chapter 2. OPTIMAL DESIGN OF BARRIER SCREW

2.1 Maillefer's Theory

2.1.2 Second approximation

2.1.3 The Maillefer's Theory

2.2 Barrier screw parameters for design

2.2.1 Barrier screw parameters for CRD Barrier Screw

2.2.2 Compression Ratio design

2.2.3 L/D Ratio

2.2.4 Barrier screw parameters for optimum design

2.2.4.1 Plugging condition

2.2.4.2 Advantages

2.2.4.3 Optimum design

2.3 Shearing sections

2.4 Mixing sections

2.5 Barrier screw geometry

2.5.1 Dimensions detail of Feed section
