Keywords: dental alloy, Ti-Nb alloys, microstructure, mechanical properties, grindability, machinability.
目前生醫陶瓷的使用[15] ....................................................... 4
表2.1 純鈦的物理性質[23,24] .......................................................... 8
表2.2 鈮的物理性質........................................................................ 12
表2.3 鐵的物理性質........................................................................ 14
表3.1 本實驗之切削測試條件........................................................ 51
表4.1 Ti-5Nb-xFe合金之SEM/EDS成分分析表........................... 55
表4.2 c.p. Ti、Ti-5Nb-xFe及Ti-6Al-4V合金之平均微硬度表.......
表4.3 c.p. Ti、Ti-5Nb-xFe及Ti-6Al-4V合金的密度.................... 61
表4.4 c.p. Ti、Ti-5Nb-xFe及Ti-6Al-4V合金研削測試於不同速率下之火花及聲音................................................................ 62
