Factors Affecting Activated Sludge Acclimation to Xenobiotics

E-mail: 9608197@mail.dyu.edu.tw

Luong Thi Mai Ly、張玉明
Effects of initial 1,4-D and sludge concentrations (Experiment 2) ...........................................86

5.2 Effects of starved sludge on 2,4-D biodegradability (Experiment 3) ...........................................87

5.3 Effects of adding a biogenic substrate (Sucrose)(Experiment 4) ...........................................87

5.4 Effects of adding similar substrate (Phenol)(Experiment 5) ...........................................88

REFERENCE .......................................89
