

Modeling of Leaching of Silver, Copper and Indium

NguyenViet Hoai、李清華

E-mail: 359000@mail.dyu.edu.tw

ABSTRACT

I would like to express my warmest gratitude to all people who in one way or another have helped me in the completion of this thesis. I wish to convey my sincere thanks to my advisor Professor Ching-Hwa Lee (in Department of Environmental Engineering – Dayeh University), who not only gave me an opportunity to carry out this research in the area of my interest but also supported and cared my daily life in Taiwan. Moreover, I must thank my dear friends in Lab 801 who have created the best atmosphere for me during the 2-year study in Taiwan. The most and above all, I missed my family while living far from them but they always encouraged me to finish my work.

INTRODUCTION	1
1.1Background	1
1.2Objectives	1
2 CHAPTER 2. LITERATURE REVIEW	2
3.2.1Leaching process	3
3.2.1.1 Definition of leaching process	3
3.2.1.2 General types of leaching process	3
4.2.1.2.1 Leaching process in agriculture	4
4.2.1.2.2 Bioleaching	4
5.2.1.2.3 Leaching in metallurgy	5
5.2.1.2.4 Leaching in chemistry	5
9.2.2 Overview of silver, copper and indium	9
10.2.2.1 Overview of silver	10
10.2.2.2 Overview of copper	10
11.2.2.3 Overview of indium	11
12.2.3Modeling in leaching processes	12
12.2.4Nonlinear regression analysis in SPSS	12
software.....	21
2.4.1 SPSS software	21
2.4.2 Nonlinear regression analysis	21
22 CHAPTER 3. STUDY METHOD	22
3.1 Development of leaching model	23
3.2 Leaching data collection	23
3.2.1 Leaching data of silver (Ag)	26
3.2.2 Leaching data of copper (Cu)	26
3.2.3 Leaching data of indium (In)	27
3.3 Optimization of leaching model	27
28 CHAPTER 4. RESULTS AND DISCUSSION	28
4.1 Optimal leaching model of silver	29
4.1.1 Leaching data of silver	29
4.1.2 Modeling of silver leaching by	29
nonlinear regression program.....	32
4.2 Optimal leaching model of copper	32
4.2.1 Leaching data of copper	70

.....	70	4.2.2 Modeling of copper leaching by nonlinear regression program.....	72
.....	102	4.3 Optimal leaching model of indium	102
.....	102	4.3.1 Leaching data of indium	102
.....	104	4.3.2 Modeling of indium leaching by nonlinear regression program	104
.....	132	4.4 Comparison between different leaching models of silver, copper and indium	132
.....	134	CHAPTER 5. CONCLUSION AND SUGGESTION	134
.....	134	5.1 Conclusion	134
.....	138	5.2 Suggestion	138
