ABSTRACT

In this article, the electromagnetic suspension system is modeled as a neural-based T-S fuzzy system, and then the optimal fuzzy control design scheme is proposed to control the current and voltage-controlled system with minimum current and voltage consumption, respectively. The proposed self-constructing neural fuzzy inference network is a six layer neural network (SONFIN) modified from the well-known SONFIN network, which can construct a linear T-S fuzzy model and affine T-S fuzzy model of the system just by the input and output (I/O) information. Based on the T-S model, we can construct the optimal fuzzy control scheme to efficiently regulate the highly nonlinear, complex and uncertain electromagnetic suspension system to the equilibrium state.

Keywords: SONFIN, electromagnetic suspension system, optimal fuzzy control

Keywords : SONFIN ; optimal fuzzy control ; electromagnetic suspension system

Table of Contents

CHAPTER 1 INTRODUCTION	1	1.1 Motivation	1	1.2 Review Literature	1
.....2 1.3 Survey of Fuzzy Model	2	2 1.4 Survey of Fuzzy Control	2	3 1.5	3
Brief Sketch of the Contents	5	CHAPTER 2 ELECTROMAGNETIC SUSPENSION SYSTEM	6	2.1	2.1
Construction	6	2.2 Mathematical Model	7	CHAPTER 3 NEURAL	7
NETWORK BASED FUZZY MODELING	12	3.1 Takagi and Sugeno ' s Fuzzy Model	12	3.2 Linear T-S	12
Fuzzy Model and Affine T-S Fuzzy Model	13	3.3 Structure of SONFIN	15	3.4 T-S Fuzzy Modeling of	15
Electromagnetic Suspension System	20	CHAPTER 4 OPTIMAL FUZZY CONTROL DESIGN	26	Electromagnetic Suspension System	20
CHAPTER 5 INTEGRATION OF FUZZY SYSTEM MODELING AND OPTIMAL CONTROLLER DESIGN	26	4.1 Local	26	CHAPTER 5 INTEGRATION OF FUZZY SYSTEM MODELING AND OPTIMAL CONTROLLER DESIGN	26
.....32 5.1 Numeral Simulation	33	4.2 Local Concept Approach of Affine T-S Fuzzy Model	30	CHAPTER 6 CONCLUSION	30
.....33 5.2 Simulated Results of The Robustness	33	5.1 REFERENCE	51	CHAPTER 6 CONCLUSION	53
