ABSTRACT

In recent years, the consumers realize that Green Marketing is a trend of the world. There are many ways of marketing to promote environmental protection and green products for governments and enterprises. Under these conditions of producing and consuming the green product, the sensitive associations' assisting the government apparatus correlation policy and the law, it is the method for the society continuing forever the management development. The subjects of this research include the consumers who are above 18 years old. This study adopted descriptive analysis, correlation analysis, factor analysis, and LISREL as the statistic tools. This study tried to understand in depth that the key factor of degree of implement for green consumer behavior in consumers, and then discuss how to improve. It provides a comprehension and reference for publicizing, educating and promoting the green products for governments, enterprises and consumers. Based on the analysis of questionnaire responses, the research findings are summarized as follows: (1) In the direct effect part: the causality of green consumer behavior to the value has not been supported; consciousness value and consumption attitude to green consumer behavior has been significantly supported. (2) In the indirect effects part: value and consciousness value quality through consumption attitude significantly influence green consumer behavior.

Keywords : consumption attitude ; green consumption ; consciousness value ; green product
