

Examining the Link between Ethics and Abusive Supervision: Evidence from Taiwan and Mainland China

楊慧貞、吳孟玲

E-mail: 9701158@mail.dyu.edu.tw

ABSTRACT

Previous studies on abusive supervision have focused on either organization- or individual level analysis. This multilevel study examined the effect of ethical ideology, moral intensity, corporate ethical values, and procedural justice climate on abusive supervision using a sample of 261 supervisors from Taiwan and Mainland China. Results indicated that with the exception of relativism, all our hypothesized relationships were supported. Implications of these findings for management practice and future research are discussed.

Keywords : abusive supervision ; idealism ; relativism ; moral intensity ; corporate ethical values ; procedural justice climate
