ABSTRACT

Changhua Hakka Traditional Culture and Living Learning Center (Sipan Campus of Cheng Gong Elementary School) is located in Sipan Village, Sijhou Township, Changhua County, which belongs to Northern Hakka immigrants villages in Japanese colonial rule. The Hakka residents in the village have been affected by other ethnic groups and generally act like the other ethnic groups. To change this phenomenon, what the researcher wants to do is start with a rare survival Hakka school, revive the Hakka culture with the information technology, de-velop Changhua County Hakka life circle and build up the environment full of Hakka culture. Therefore, the Hakka culture can be broadened around from this small foothold. This study aims to research how the information society influences and interacts with “ Changhua County Hakka Traditional Culture and Living Learning Center ” . The researcher tries to analyze the advantage and weakness with the vision of information and society and use information technology to innovate and broaden the Hakka culture. At last, through the UTAUT, the researcher investigates the staff in the living learning center how to accept and use the whole system.
