ABSTRACT

From a global perspective, the trend of merging between enterprises is much active. The tactic of mergers and acquisitions is one common way of companies to expand. This study examines the performances of companies after mergers to discuss its factors of success or failure. The study is conducted by cases study. We choose two mergers of telecommuni-cations industry of FarEasTone and KG Telecommunications and the case of Taiwan-Moble and TransAsia Telecommunication. By discussing the mergers' performance from financial perspective, customer perspective, internal process perspective and learning and growth perspective of balanced scorecards(BSC) and conducting the com-parison and analysis of FarEasTone and TaiwanMoble of the same period to access the consolidate performance. The empirical results show that, as balanced scorecards indicate, from the financial perspective, the decreasing market share of FarEasTone is due from increasing market share of Chunghwa Telecom, while on the other three perspectives the consoli-date performances of merger of FarEasTone and KG Telecommunications are better than the performances of merger of TaiwanMoble and TransAsia Telecommunication, that is, the synergy of FarEasTone is getter than that of TaiwanMoble

Keywords : balance scorecard ; merger ; acquisition
