ABSTRACT

The purpose of this study is to construct the National Taiwan Craft Cultural Park Experience Value Scale for visitors and Studies thoroughly the student. Based on the steps of scale development, the researcher constructed a standardized testing tool for further exploration. Based on the relevant literature, the researcher developed multiple dimensions of the Experience Value. There were four dimensions in the scale, "aesthetics", "playful-ness", "service excellence", "consumer return on investment". Sampled from visitors and Studies thoroughly the student in National Taiwan Craft Cultural Park, facilitates the sampling way provide questionnaire in the tourist, in the thorough study class by the general survey way provide questionnaire, there were 203 valid samples for this study. The Experience Value Scale has 30 items resulted from the data was analyzed by proper statistical procedures. Structural equation modeling and competing modeling of confirmatory factor analysis (CFA) are adopted to select the optimal model and assure the reliability and validity of the scale. Result demonstration thorough study class students in aesthetics value explanation for highest, but with the service excellence and consumer return on investment explanation next best, the playfulness to be lowest; Tourist in playfulness value explanation for highest, but service excellence and the consumer return on investment next best, is lowest in the aesthetics value explanation. Finally the confirmation result, has the good letter in the experience value pattern and the construction validity, this meter may supply the following related research to continue to use.

Keywords : Craft Cultural Park ; Museum ; Experience Value
