ABSTRACT

A Study on Participating Motivation and Social Support of Junior High School Swimming Team Members in Central Region of Taiwan Student:Lin, Chen-Chi Advisor: Prof . Wen-Guu Lei Da-Yeh University ABSTRACT The research is to explore the relationship between swimming team members' participating motivation in junior high schools and their social support in mid-Taiwan. The research was conducted through questionnaires. From 150 questionnaires, 124 samples are valid with applicable rate 82.7%. The findings are as follows: 1. The swimming team members are mainly males, and most of them are members of school representative teams. The teams have at least 2 years seniority and most of them are regarded as prominent teams in the local counties. 2. The needs of ' health ' ($M=4.37$), ' sense of accomplishment ' ($M=3.79$) and ' relaxation ' ($M=3.61$) are served as the major participating motivations for swimming team members. In terms of social support, the support from the teammates is the most apparent ($M=3.67$). 3. There is no evident difference in terms of team members' participating motivation in various types of teams, while there is a notable difference in terms of team members' age, seniority of the team, and those teams which have the best performance. 4. As far as social support is concerned, there is no obvious difference in terms of different sex and types of teams while there is an apparent difference in terms of seniority of teams and those teams which have the best performance. 5. There is some notable relevance between swimming team members' participating motivation in junior high schools and their social support in Mid-Taiwan. In conclusion, the findings of this research are served as suggestions for related departments and staff in schools as well as a proposal of further research.

Keywords : swimming team ; participating motivation ; social support
